

# Digital Solutions for Orthopedic Surgeries

Digitalizing the complete patient journey from patient categorization to post-surgery management

## Quick overview

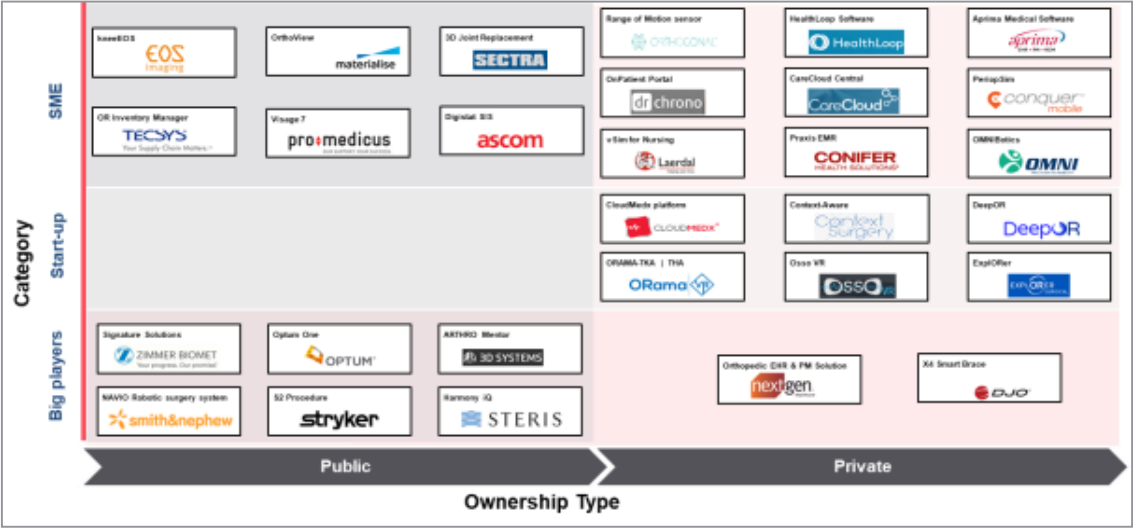

Our client was working towards digitalizing the various aspects related to patient management for orthopedic surgeries. To define a technology roadmap to integrate different digital technologies around the patient journey starting from patient categorization to surgical planning and, to post-surgery management.

## Client success details

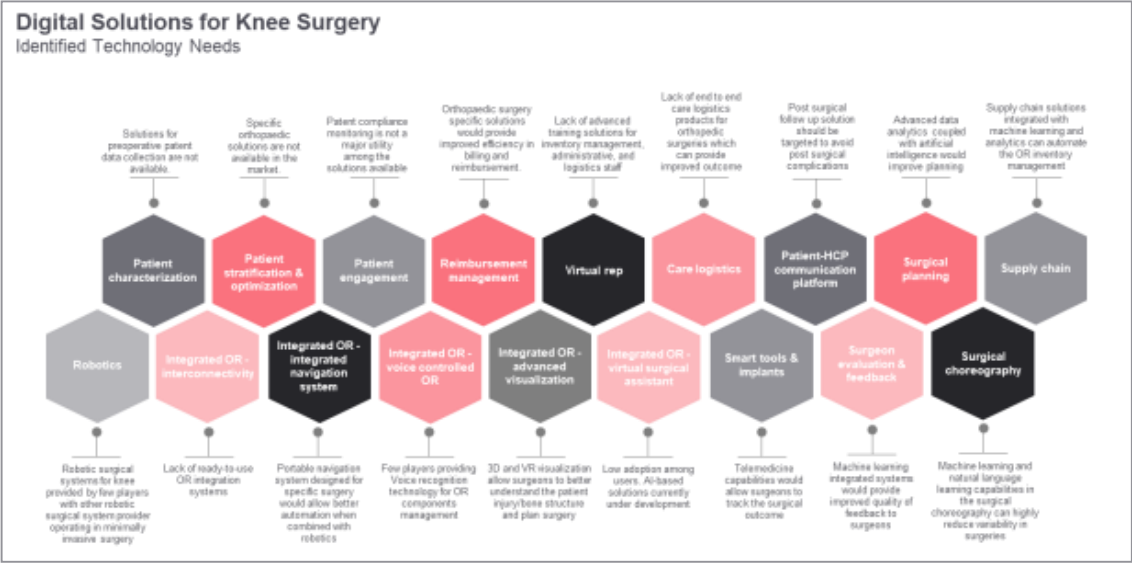

With FutureBridge’s assistance, our client was able to understand the different use-cases of digital technologies, thus enabling them to define technology capabilities needed in the organization to build a technology roadmap. FutureBridge supported the client to answer these business questions including:

- 

Digitalization is touching every aspect of healthcare, where companies are working towards building a seamless experience for different stakeholders across the patient care continuum.
- What are the on-market digital solutions for knee, hip, shoulder, and other orthopedic surgeries?
  - What are the key differentiating features of identified technologies/solutions?
  - What are the capabilities offered by the key players?

- FutureBridge conducted comprehensive secondary research across the healthcare digitalization ecosystem for:
- Validation of different use-cases/application areas of digitalization in the patient management
  - Identification of digital solutions that will deliver the desired use-cases
  - Mapping technology know-how and capabilities required to implement the identified solutions
  - Players with capabilities to deliver the unique value propositions

FutureBridge identified and validated the use-cases of digitalizing the complete surgery process to provide holistic experience to all stakeholders from pre to post surgery management.

FutureBridge analysis helped our client to understand the complete ecosystem of players active in the healthcare digitalization ecosystem and enabled them to build a technology roadmap to digitalize the patient journey.

## About FutureBridge

FutureBridge tracks and advises on the future of industries from a 1-to-25 year perspective.

We keep you ahead on the technology curve, propel your growth, identify new opportunities, markets and business models, answer your unknowns, and facilitate best-fit solutions and partnerships using our platforms, programs, and access to global ecosystems and players.
