## FutureBridge

# CO<sub>2</sub> to Chemicals

Converting CO<sub>2</sub> emissions into intermediate and platform chemicals

> Global carbon dioxide emissions from fossil fuels and cement have hit a record high of 36.6 billion tonnes this year.

### Key Promising Chemicals from CO<sub>2</sub> and Current Market

**Carbon Monoxide** 

Methanol

Ethvlene

**Polycarbonates** 

Acrylic acid

DME

#### **Research and Pilot Scale Projects Operating to** Convert CO<sub>2</sub> into Chemicals

#### Hydrogenation and carboxylation processes have matured and are used in methanol and urea production, utilizing $CO_2$

PRODUCT TRL Methanol 7-9**CONVERSION TECHNOLOGY** 7-9 Methane Hydrogenation 5-8 Liquid fuels via FTS Formic acid 3-5 DME 2 - 3Formaldehyde 2-3Urea 7-9 Carboxylation Polymers 6-7 Cyclic carbonates 5-7 Carboxylic acids 2-4

### Promising Startups in the CO<sub>2</sub> to Chemicals space

Large companies join hands with startups to use the CO<sub>2</sub> derived chemicals in their products

100% atomic economy as compared

#### Conclusion

a competitive price

technology catalytic hydrogenation

of CO2 to produce Ethylene and other green chemical processes possible for

The short-to-medium-term potential for CO<sub>2</sub> to chemicals is significant in reducing emissions in high-emissive sectors, such as cement and steel production. However, CO<sub>2</sub> conversion into chemicals, fuels, and materials, remains under utilized in recent times due to the prohibitive cost of the capture and utilization steps. The market for CO<sub>2</sub> use is expected to remain relatively small in the short term, but early opportunities could be developed.

#### About FutureBridge

make syngas that can be converted

into liquid hy drocarbons.

FutureBridge tracks and advises on the future of industries from a 1-to-25 year perspective.

We keep you ahead on the technology curve, propel your growth, identify new opportunities, markets and business models, answer your unknowns, and facilitate best-fit solutions and partnerships using our platforms, programs, and access to global ecosystems and players.
